Subject: Follow Up Stuff for Lane Plating
Date: Thursday, December 6, 2018 1:46:28 PM

Hey guys,

Can we work on trying to get these follow-up requests filled? With Ben's questions, I am going to send him Rebecca's way, and share what she has already shared with us. So no worries there. I feel like the site tours question is a no-go as well...

The below are the technical questions I was unable to answer, and have the contact information for each to send the information along:

- Joppa Community Group: How will climate change and flooding affect potential release of contaminants from the site?
- Joppa Community Group: Will there be air testing for Hexavalent Chromium if found?
- Joppa Community Group: Will the city or EPA allow site tours for the public?
- Ben Sandifer (have contact info): Is there any water shed, or site water testing that is sharable with the public? (answered that TCEQ has shared water testing information with the public, and we can forward information from Rebecca Storms, the TCEQ rep for the site)
- Jim Schermbeck, Director of Downwinders at Risk: Can EPA share the lead levels for the site, and will the site be returned to acceptable federal and state lead standards? Mr. Schermbeck also asked the same for all associated metal levels for Lane Plating.

Thanks,

-Ed-
